

Stamp Value Tips

When you're putting stamps on a package:

- Find out how much **postage** you need.
- If you have **more than one** kind of stamp, find the stamp that's worth the **most**. In this game, that's the **\$1** stamp. Take one and ask yourself, is this the **right amount of postage**?
- If you don't have enough, take another stamp. Ask yourself, how much are these stamps worth **together**? Is this **enough**?
- If you have **too much**, take a stamp that's worth **less** than the first one. Ask yourself, how much are these stamps worth **together**? Is this the right amount of postage?
- If you don't have the right amount yet, take another stamp. Keep adding stamps until you have **exactly** the right amount.
- Put the stamps on the **package**. Be careful not to cover up the **address**! Now your package is ready to go.
